About the treatment

Digital brows can be made into an ombre or powder effect brow. A digital machine implements pixels of pigment, shading the brow until the density and colour desired is built up. Digital brows are longer lasting and recommended for oilier skin types. It can also create the effect of real brow hairs to create a natural look to perfect your brow shape.

The procedure

The treatment will take approximately 2-3 hours, with the first hour spent prepping and creating the perfect brow shape.

- Stage 1 - **Consultation** Covering medical history, contraindications, shape, colour and what you want to achieve.
- Stage 2 - **Brow mapping** Creating the perfect eyebrow shape for you.
- Stage 3 - **Begin the treatment** I will do around 4 passes on each brow to ensure the pigment is implanted in your brows.
- Stage 4 - **Top up** The same procedure is carried out 5 - 8 weeks later (included in the initial cost), to further define or add hair-strokes and ensure you are entirely satisfied with the colour and shape of your new brows.

Contraindications

- Pregnancy
- Diabetes
- Heart conditions
- Haemophilia
- Epilepsy
- Autoimmune disorders
- Blood borne diseases
- Thyroid conditions
- Cancer
- Breastfeeding
- Scarring in treatment area

Pre-Treatment

DIGITAL BROWS

On the day

- Eat before your treatment, this will help with your blood sugar levels
- Wash your hair, as you cant get your brows wet post treatment

24 hours before

- Avoid Alcohol
- Avoid Coffee
- Avoid Energy drinks
- Avoid IbruProfen
- Avoid Aspirin

3 days before

- Any brow waxing, threading or tinting should be completed.
- Avoid fake tanning your face

2 weeks before

- Do not have microdermabrasion, laser, chemical peels or intense treatments on the face
- Do not have botox
- Do not use any retinol/ anti aging creams on the area.

Aftercare

DIGITAL BROWS

Careful attention needs to be taken when caring for your semi-permanent makeup post procedure, within the next 3 days your procedure will lightly scab over then peel away, do not pick or pull at the treated area and only use aftercare provided.

It will take 24 hours for the area to create a protective barrier; your final colour result will take 28 days. A re-touch cannot in any circumstances take place until 28 days as scarring may occur. Your procedure will take 3 phases, 1) heal, 2) peel, 3) fade. We do not recommend that make up is worn post procedure or during the healing process

Days 2-7

- Apply a THIN layer of healing gel with a cotton bud morning and night.

Days 4 - 14

- Blot brows gently with a damp cotton pad and sterile water morning and night to avoid blood/lymph build up.

Do not

- Allow your brows to get wet!
- Use a washcloth or anything abrasive on your tattoo
- Pick or scratch your tattoo
- Apply any make up on the brow area for at least 3 days! Be careful when applying daily skincare products and makeup around the area
- Exercise or excessively sweat for at least 10 days
- The Red Cross has advised not to give blood for 6 months following a semi-permanent make-up procedure.

Avoid

- Saunas, hot baths/showers facial treatments for 14 days post treatment or until all scabbing has healed.
- Avoid sun beds and sunbathing for at least 14 days.
